## DIM-B

Agricultural Irrigation
Water Meter

DIM-B
(Water Meters)

## Application

The DIM-B Agricultural Irrigation Water Meter series is used for the measurement of high flows of cold potable water passing through the pipeline.
The DIM-B is built with field use in mind: rugged, durable, dependable and long-lasting, while maintaining high accuracy.
The DIM-B is your best option for registering water consumption outdoors.

## Working Conditions

Water temperture: $\leq 40^{\circ} \mathrm{C}$
Water pressure: $\leq 1.6 \mathrm{MPa}$

## Consruction

The DIM-B water meter consists of a cast iron body, a measuring mechanism and several connecting pieces.

## Working Principle

The meter uses a multi-bladed plastic paddle wheel partially immersed in the pipe's water flow. The paddle wheel in turn is connected to a register through mechanical and magnetic relays.
The flowing water causes the paddle wheel to rotate, indicating the volume on the DIM-B register display.

## Features

- Includes a magnetic drive for lower transmission resistance.
- Sealed dry dial register ensures clear reading.
- Register can rotate $360^{\circ}$ for easy reading from all directions.
- The body is made of cast iron coated with UV resistant epoxy.
- The paddle wheel design resists blockage and damage to the meter due to solids in the water.
- The paddle wheel design resists blockage and damage to the meter due to solids in the water.
- The measuring mechanism can be easily replaced in case of damage.
- Checking, maintaining and replacing the register can be preformed while the body remains attached to the pipe.
- The paddle wheel parts are identical in most meter sizes.
- The DIM-B can optionally be equipped with a reed switch ( $360^{\circ}$ rotation is disabled).
- Suitable for irrigation and waste water applications.

Dimensions \& Weights for pressure rating PN10

| Nominal diameter | DN | 50 | 65 | 80 | 100 | 125 | 150 | 200 | 250 | 300 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Length (mm) | L | 200 | 200 | 225 | 250 | 250 | 300 | 350 | 450 | 500 |
| Height (mm) | H | 252 | 266 | 283.5 | 293.5 | 307 | 336.5 | 390 | 445.5 | 497.5 |
| Working height (mm) | H1 | 338 | 352 | 369.5 | 379.5 | 393 | 422.5 | 476 | 531.5 | 583.5 |
| Outside diameter (mm) | D | 165 | 185 | 200 | 220 | 250 | 285 | 340 | 395 | 445 |
| Circle diameter (mm) | D1 | 125 | 145 | 160 | 180 | 210 | 240 | 295 | 350 | 400 |
| Num. of Connecting bolts | nxM | 4xM16 |  | 8xM16 |  |  | 8xM20 |  | 12xM20 |  |
| Meter weight ( Kg ) |  | 10.5 | 11.8 | 15.5 | 17.5 | 19.5 | 30.5 | 42.5 | 58.5 | 80.5 |
| Body weight (Kg) |  | 8 | 9.3 | 13 | 15 | 17 | 28 | 40 | 56 | 78 |

## Dimensions \& Weights for pressure rating PN16

| Nominal diameter | DN | 50 | 65 | 80 | 100 | 125 | 150 | 200 | 250 | 300 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Dimension Picture

- Nominal diameter and arrow are indicated on both sides of the meter body.
- The lid can open $180^{\circ}$.

## Main Technical Data

| Nominal diameter | DN | 50 | 65 | 80 | 100 | 125 | 150 | 200 | 250 | 300 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Maximum flow rate $\mathrm{m}^{3} / \mathrm{h}$ | Omax | 70 | 100 | 150 | 250 | 350 | 500 | 900 | 1200 | 1600 |
| Nominal flow rate m ${ }^{3} / \mathrm{h}$ | On | 35 | 50 | 75 | 125 | 175 | 250 | 450 | 600 | 800 |
| Transition flow rate $\mathrm{m}^{3} / \mathrm{h}$ | Qt | 10.5 | 15 | 22.5 | 37.5 | 52.5 | 75 | 135 | 180 | 240 |
| Minimum flow rate $\mathrm{m}^{3} / \mathrm{h}$ | Omin | 2.8 | 4 | 6 | 10 | 14 | 20 | 36 | 48 | 64 |
| Maximum reading $\mathrm{m}^{3}$ |  | 9999999.99 |  |  |  |  |  | 99999999.9 |  |  |
| Minimum reading $\mathrm{m}^{3}$ |  | 0.01 |  |  |  |  |  | 0.1 |  |  |
| Minimum graduation L |  | 0.001 |  |  |  |  |  | 0.01 |  |  |

Maximum Permissible Error:
In the lower zone from Omin inclusive up to but excluding Ot is $\pm 5 \%$
In the upper zone from Ot inclusive up to and including Omax is $\pm 2 \%$

DIM-B50~150:

DIM-B/Y-50~150:

- DIM-B-50 / DIM-B-200: meter type.

DIM-B/Y-50, DIM-B/Y-200: meter with reed switch option.

- Qn 15/Qn 250: nominal flow rate.
- $40^{\circ} \mathrm{C}$ : maximum water temperature.
- Scale 1:1

## Installation

- The meter can be installed in any position:

DIM-B200~300:

DIM-B/Y-200~300:

- The meter must be installed with the flow direction as indicated by the arrow on the meter body.
- Flush the pipeline before installing the meter.
- A horizontal installation with the register facing up is recommended.
- The meter must be installed at least 10 "meter diameters" of straight pipe upstream of the meter and 5 "meter diameters" of straight pipe downstream, to avoid turbolent flow through the meter. For example, if the meter diameter is 2 ", it should be installed with an upstream straight pipe length of $20^{\prime \prime}$ and a downstream straight pipe length of 10 ".
- Separation valves should be installed up- and downstream of the water meter.
- Note maximal temperature meter limitation before installation.

5

## DIM-B With Reed Switch Option

## Features

- The reed version DIM-B-50~300 Water Meter is equipped with a reed switch assembly which can be connected to remote reading systems.
- The reed switch closes an electric circuit once per full dial rotation. Output values are set at 3 ratios: $0.1,1,10 \mathrm{~m}^{3}$
- Reed switch meters require a constant external power source.
- If the reed meter isn't supplied with the reed switch assembly, it is factory-ready for $3^{\text {rd }}$ party switches.
- The reed meter has all the advantages of the basic DIM-B-50~300 water meter.
- Dimensions and technical data are identical to the basic DIM-B-50~300 water meter.

## Working Conditions

- Maximum water temperture: $40^{\circ} \mathrm{C}$ (for cold potable water meter)
- Maximum water pressure: 1.6 MPa
- Maximum distance to data logger: 100m

## Schematic Figure

Reed Switch Assembly

Alnico Magnet

## Reed Switch Assembly

- The reed meter consists of a plastic housing with a reed switch, designed to read the total consumption of water.
- Pulser wiring: cable.

1) 2 core, 1.5 m long, 3.5 mm diameter.
2) Red-black: pulse team.

- Reed switch: single.
- Electric data:

Vmax: 24AV/DC,
Imax: 0.01A.

- Drawing:

## Data Output Options

- The special meter comes in two model variations, which indicate different pulse rates. See table below for sizing.
- DN: nominal diameter.

| Positions of special pointer | $\mathrm{X} 0,01$ | $\mathrm{X} 0,1$ | X 1 |
| :--- | :---: | :---: | :---: |
| Reed switch pulse | 1 pulse for each |  |  |
| Water quantity per rotation | $0.1 \mathrm{~m}^{3}$ | $1 \mathrm{~m}^{3}$ | $10 \mathrm{~m}^{3}$ |
| DN50/65/80/100/125/150 | $\bullet$ | $\bullet$ |  |
| DN200/250/300 |  | $\bullet$ | $\bullet$ |

## Innovation

Expertise

Hundreds of companies in the industrial, civil engineering, municipal and agricultural sectors around the world have chosen DOROT's innovative and field-proven technologies. Since its establishment in 1946, DOROT leads the valves market with continued innovation, uncompromising excellence and firm commitment to its customers, consulting and supporting them through all stages of a project and overcoming challenges in R\&D, design, implementation, and maintenance.
